

Customisation Guide

Category Page

You Can Edit

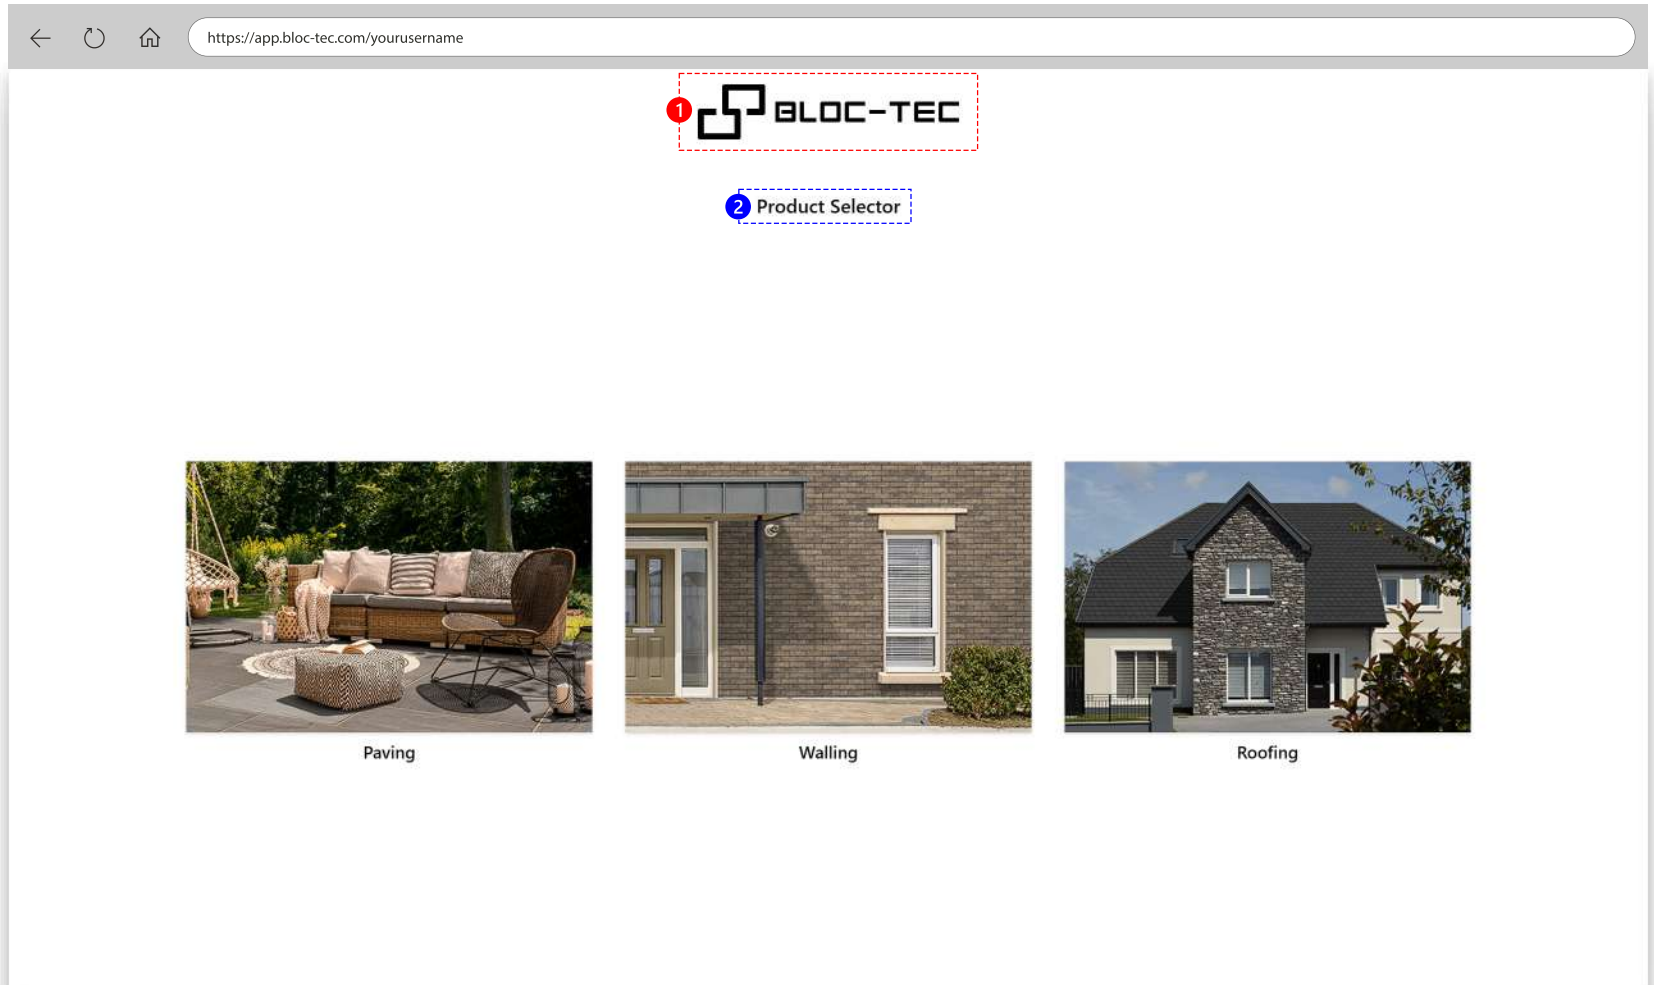

We Set Up

1 Logo Visibility

Can be hidden by adding `logo=false` to the URL.

2 Title

May be changed upon request.

Sub Category Page

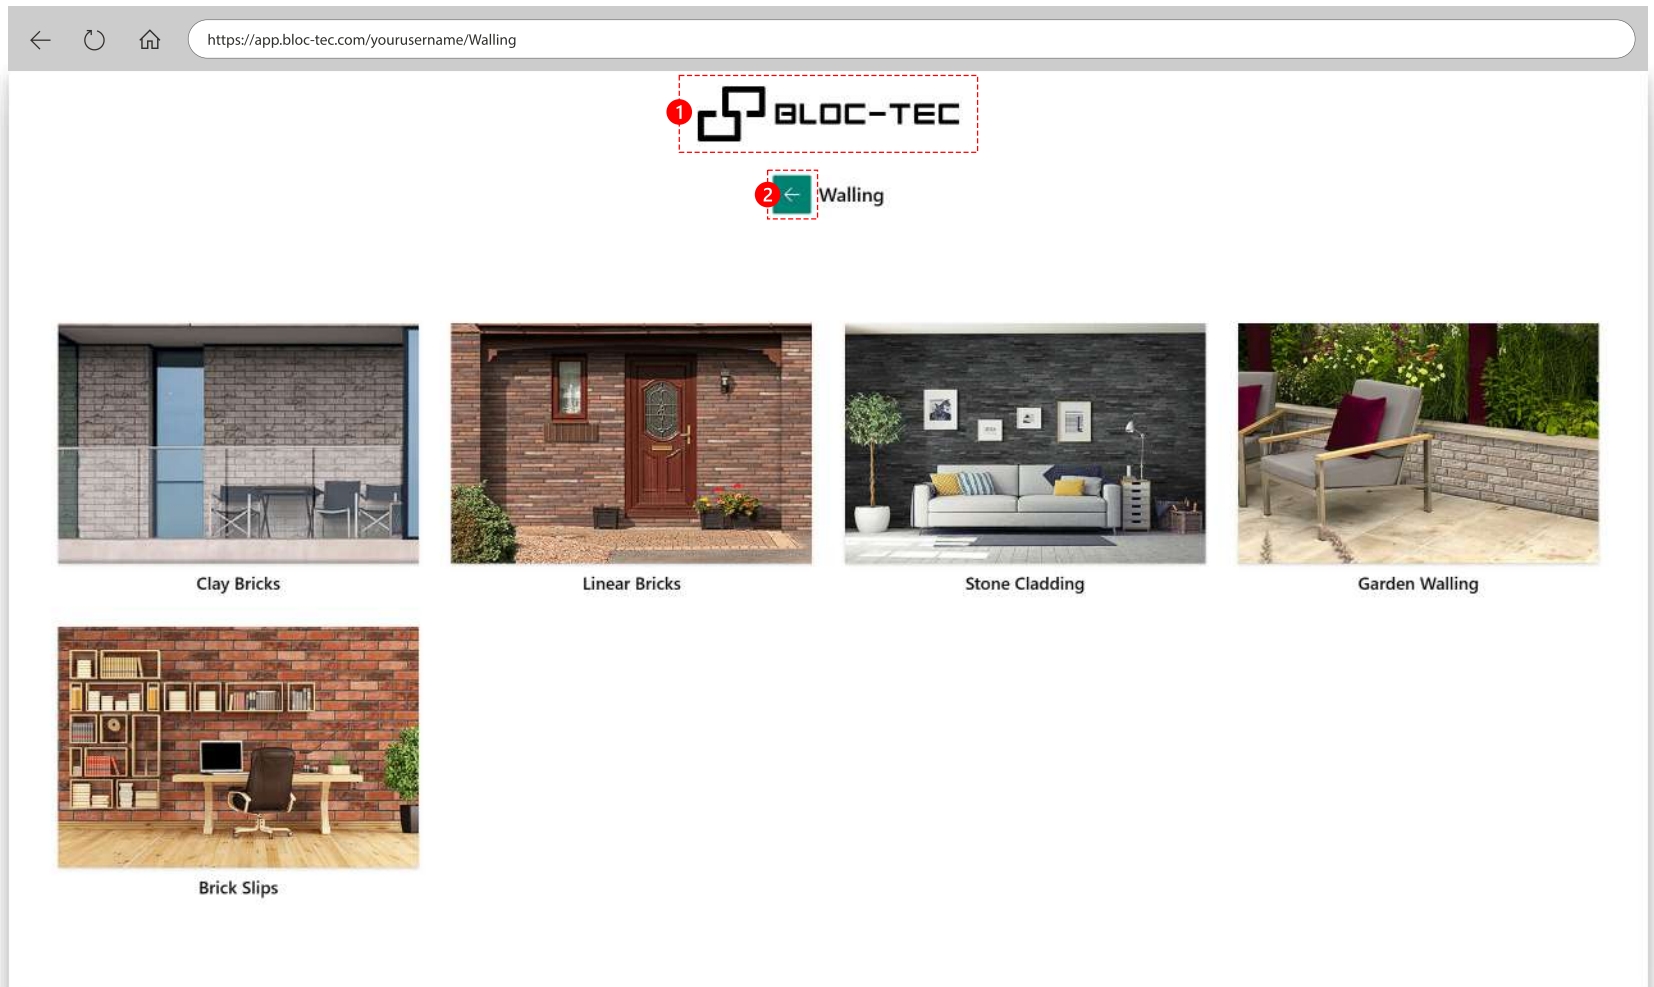

You Can Edit

1 Logo Visibility

Can be hidden by adding `logo=false` to the URL.

2 Back Button Visibility

When a sub category page is loaded, you may wish to hide the back button by adding `subCatBack=false` to the URL.

The screenshot shows a web browser interface with the URL `https://app.bloc-tec.com/yourusername/Walling`. The page features the BLOC-TEC logo at the top center, which is annotated with a red circle and the number '1'. Below the logo is a green back button with a white left-pointing arrow, annotated with a red circle and the number '2', followed by the text 'Walling'. The main content area displays five images of different walling styles, each with a caption below it: 'Clay Bricks', 'Linear Bricks', 'Stone Cladding', 'Garden Walling', and 'Brick Slips'.

Add-On Module

1 Logo Visibility

Can be hidden by adding `logo=false` to the URL.

2 Back Button Visibility

When a sub category page is loaded, you may wish to hide the back button by adding `subCatBack=false` to the URL.

3 Product Controls

We can configure product options to your preferences.

4 'More Info' Button

When the Bloc-Tec software is placed in an Iframe, the product configuration information can be sent to the parent website.

This button text and icon can be changed to suit your needs.

5 Share Button

The configured product can be shared. This button can be hidden upon request.

6 Scenes

Scene selection can be configured from our extensive range of default scenes.

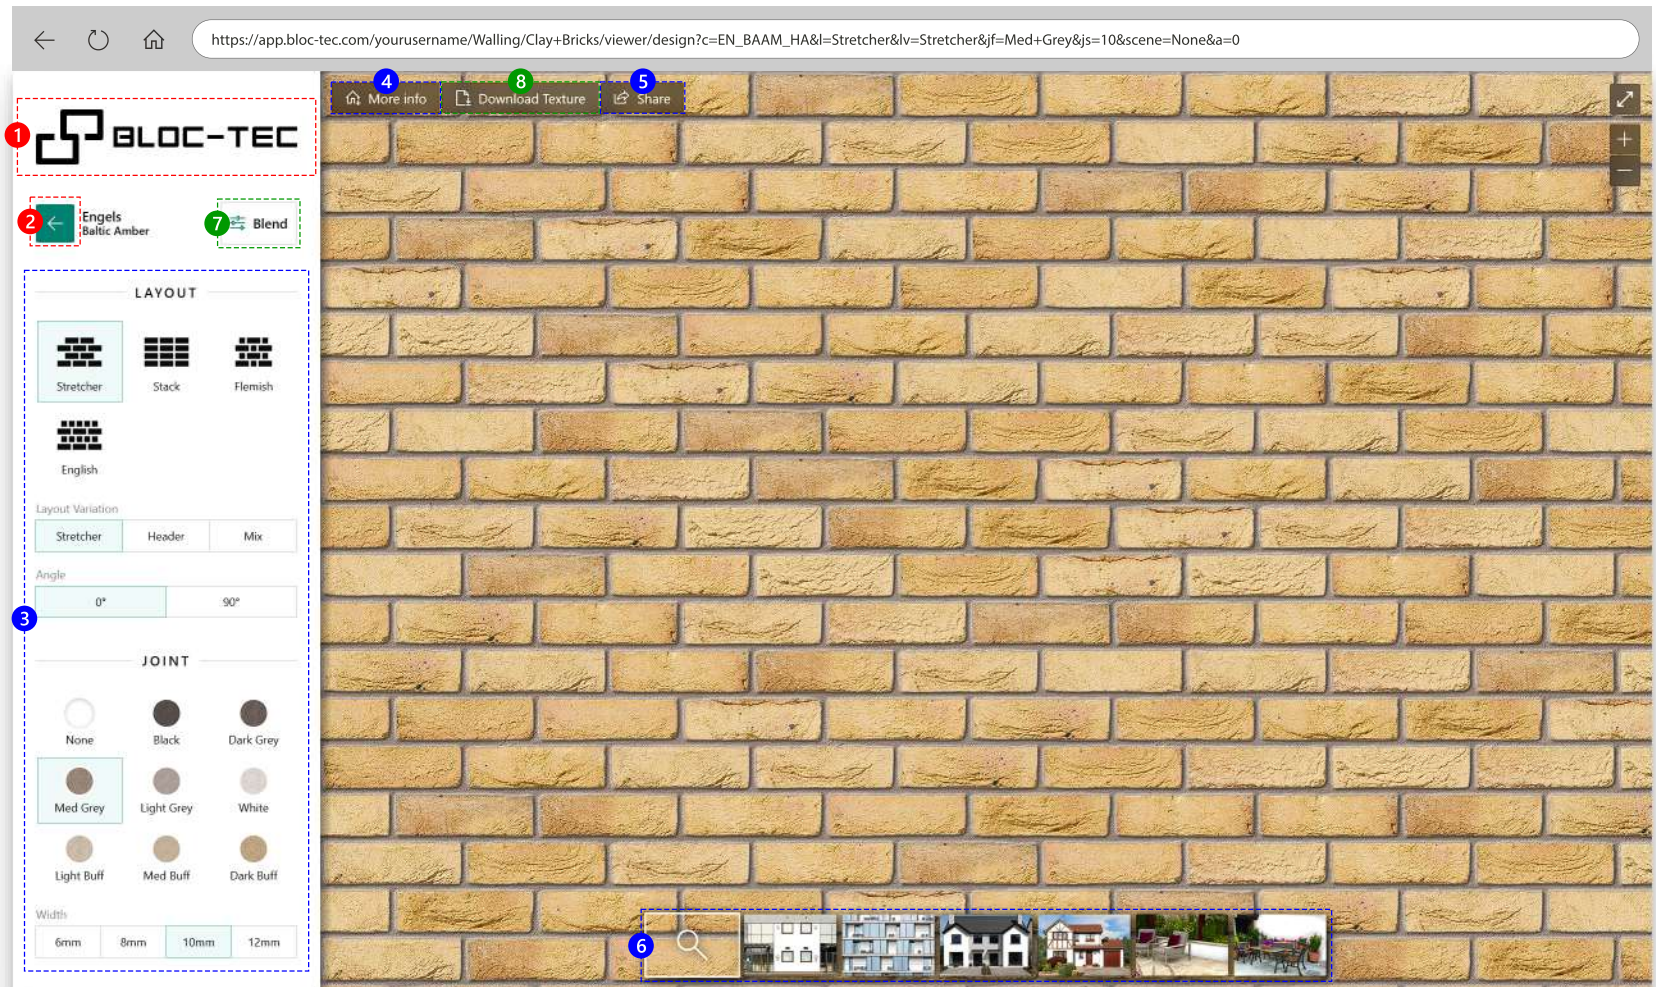

Custom scenes can be configured and added unique to your account.

7 Product Blender

Add-on blend module available.

8 Download Texture Button

Add-on seamless texture module available.

URL Guide

1 Username

Your chosen username.

2 Page Path

Indicates what page is to be displayed.

3 Query String

Information about what to display on the page.

Most query parameters are generated automatically by the software when configuring a product. However, the logo and back button visibility queries must be added manually to the URL.

i Tip

A specific category, sub category or product configuration may be loaded directly, without navigation by copying the URL from the browsers address bar.
